

SW-420 Vibration sensor module

This vibration sensor with LM393 chip is ideal for use with the Raspberry Pi or Arduino and has many possible applications: For example, automatic switching on and off of devices when they vibrate or when they are switched off

Product number SW-420

Weight 0.01kg

Product description

This vibration sensor with LM393 chip is ideal for use with the Raspberry Pi or Arduino.

Many possible applications are conceivable: For example, automatic switching on and off of devices in the event of vibration or shock, or as a digital sensor to monitor the activation of a device (garage door, washing machine, etc).

This is a module with a digital output (HIGH or LOW). The sensitivity can be adjusted via the potentiometer.

Technical data:

- Chipset: LM393
- Input voltage: 3-5 V
- 3mm mounting hole
- Status LED
- Dimensions incl. pin header: approx. 40 x 14 x 7 mm

Product properties

Zolltarifnummer 84733080

Gross Weight (kg) 0.010

Country of Origin China

Product ID SW-420

Manufacturer ID SW-420

Brand BerryBase

EAN 4251266703976
